**FOR IMMEDIATE RELEASE**

## **State Route 299 Curve Correction Project**

Redding – Work on a \$500,000 curve correction project on State Route 299 on Buckhorn Mountain, approximately 1.5 miles east of the Shasta/Trinity County line is nearing the final stages of construction. The remainder of the work includes a section that will undergo pavement rehabilitation. Construction crews from Ladd and Associates, of Redding, will begin grinding away the existing pavement in preparation for the final application of a new asphalt concrete riding surface.

The roadway surface will be removed in both directions of travel for nearly a 400-foot section. Motorists will be traveling over a surface of compacted gravel and asphalt grindings for the next week until the final pavement surfacing is applied.

During the hours of construction, 7:00 AM to 7:00 PM, motorists will be subject to one-way traffic control. During non-work hours, flashing amber lights will be in operation to warn motorists of the non-standard road condition. A reduced speed limit advisory will be in place through the construction zone, along with rough road signs as drivers approach the work zone.

Motorists are advised to reduce their speed as they approach the construction zone and to be prepared to stop at the traffic control stations.

**“SLOW FOR THE CONE ZONE”**
